

**brandoni** VALVES COMPANY PROFILE

# Dates to remember

Gian Renzo and Pier Franco Brandoni founded the Fratelli Brandoni.

1961

1985

The first in Italy to produce the cast iron flanged ball valve, of highly innovative requirements.

Market diversification, the introduction of the bronze range for the naval industry.

1987

1990 Range extension for a wider range of commercial offers.

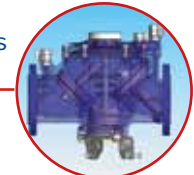

We became Brandoni S.p.A. moving from a product-related strategy to a market-related strategy, thereby answering the different needs of the global market.

1995

2000

Design of new products. The family of backflow preventers came to life.

We founded the company ACUAFLOW in Madrid, which operates on the Spanish market of the water cycle.

2004

2006

Brandoni opened a plant in Qian'An in China, which has been certified ISO 9001, which manufactures products marketed up to then according to European standards.

Major investment in new products: the first static balancing valve Ekoflux S was created

2009

2010

Photovoltaic plant to serve about 30% of the annual energy consumption with considerable savings on traditional resources.

Continuation of the modernization of the plant with the construction of the new logistics building of 2700 metres. **2011**

**2011** In 2011 we celebrated 50 years of business.

The balancing project continued with the design of the dynamic version DPCV. Two valves were created: Ekoflux.M and Ekoflux.D. **2012**

**2015** The latest in the balancing series is Ekoflux.PI, an automatic valve of PICV flow regulation.

We became Authorised Economic Operator **2015**

**2016** Acuaflow Valves entered the HVAC industry and became Brandoni Valvulas.

Restyling of the Company Logo. Brandoni changed face becoming more social and straightforward #brandonivalves **2017**

What will be the next date to remember?
